

properties

The MH-FJ-2 is a Carton Sealer with automatic detection of box width and height. The machine is suitable for the closing of American folding boxes with tape on the top and/or underside. Boxes with different dimensions may be supplied together. The box is moved to the machine on conveyor belts along the side. The machine has a timer as standard, which stops the conveyor belts if no box is provided for a certain length of time.

technical specifications

	MIN.	MAX.
L	150 mm	∞
